PROFESSIONAL SUMMARY

Final-year Cyber Security and Digital Forensics student at VIT with hands-on experience in VAPT, Application security, and Network security. Certified Ethical Hacker (CEH v13) experienced in identifying vulnerabilities, assessing attack surfaces, and security testing. Experienced in security assessments, threat analysis, and improving security posture. Passionate about Offensive Security, Incident Response, and Vulnerability Assessments.

EDUCATION

Vellore Institute of Technology 5 Year Integrated M-Tech [Specialization in Cyber Security]	Expected Graduation: 2027 CGPA: 8.63 / 10
--	--

TECHNICAL SKILLS

- Security Domains:** Web & API Security, OWASP Top 10, Network Security, Threat Modeling, Penetration Testing, Cloud Security, Security Monitoring, Digital Forensics
- Tools & Platforms:** Burp Suite, OWASP ZAP, Nessus, SQLMap, Wireshark, Microsoft Sentinel, Splunk, Postman, Docker, AWS, Linux
- Programming & Databases:** Python, Bash, SQL, HTML, CSS, MySQL
- Data Analysis:** SQL Queries, Log Analysis, Excel, Basic Statistical Analysis

CERTIFICATIONS

- | | |
|---|-----------------|
| <ul style="list-style-type: none">Certified Ethical Hacker (CEH v13 – AI) — EC-Council | Jan 2026 |
|---|-----------------|

EXPERIENCE

- | | |
|--|-----------------------|
| 63 SATS Cybertech - VAPT Intern <ul style="list-style-type: none">Conducted Web & API VAPT on enterprise applications using OWASP Top 10 methodologies, identifying 20+ vulnerabilities including SQLi, XSS, CSRF and IDOR.Performed vulnerability assessment, penetration testing, attack simulation and threat modeling of authentication, authorization and API workflows.Analyzed network security controls, access management and application architecture, delivering remediation recommendations to improve security posture.Tools Used: Burp Suite, Nessus, SQLMap, Postman and Wireshark | Oct – Dec 2025 |
|--|-----------------------|

PROJECTS

- | | |
|---|-----------------------|
| SOAR Platform (Security Orchestration, Automation, and Response) <ul style="list-style-type: none">Designed a distributed cloud security architecture integrating endpoint telemetry, system monitoring, and automated incident response workflows.Built API-driven security automation pipelines for threat detection, log analysis, and endpoint isolation, reducing manual response efforts.Implemented detection and response workflows using LimaCharlie and Tines, analyzing system data flows to improve operational efficiency and security visibility.Tools Used: LimaCharlie, Tines, Slack, Python | Sep – Oct 2025 |
| Centralized SQL Injection & Data Exfiltration Platform <ul style="list-style-type: none">Developed a vulnerability research and attack simulation platform to assess web application security and identify data exposure risks.Automated vulnerability assessment and penetration testing workflows using SQLMap, implementing error-based, union-based, and blind SQL injection techniques.Analyzed query behavior, authentication mechanisms, and application logic to validate vulnerabilities and reduce manual testing effort by 30Tools Used: PHP, Bash, SQLMap, Kali Linux | Jan – Feb 2026 |

CO-CURRICULAR ACTIVITIES

- Played a key role in organizing and management of technical workshops, events, and community initiatives through active involvement in student clubs, demonstrating leadership and teamwork.
- Participated in cyber-hackathons, CTF competitions, and collaborative technical events, enhancing offensive security knowledge, problem-solving abilities, and cross-functional collaboration skills.
